

3C is a leading CER/ERU carbon asset manager and a major international provider of services in the area of the voluntary and compliance carbon markets.

3C currently employs over 70 professionals at its headquarters and regional offices in Bad Vilbel/Frankfurt, Berlin, Santiago de Chile and Washington, DC. Additional offices will open in late 2007/early 2008 accompanied by further growth in our global team of experts. 3C is a large scale Clean Development Mechanism (CDM) and Joint Implementation (JI)-project developer and buyer of the related emission reduction credits. 3C serves as an investment advisor to the Luxembourg based 'Climate Change Investment I S.A.' carbon fund, with an investment target of 100 Million Euros. 3C is globally one of the single largest vendors of carbon credits for the

voluntary carbon market, and provides comprehensive carbon offsetting services to major international corporate clients.

The core of our business is the procurement and commercialization of carbon credits. The focus of our consultancy services is on the development, implementation and communication of carbon management strategies. The global carbon market is growing rapidly particularly in the US. In order to continue our expansive growth and to keep it above market average, we are looking to hire a

Project Manager

to be resident in our Washington, DC office.

As project manager you will be part of an international and interdisciplinary team operating in Europe, the US and Latin America. You will support the systematic upgrade of your business unit and you will ensure its profitable growth. Moreover, you will have the opportunity to contribute to the qualitative growth of the 3C Group on a solid financial basis. As successful candidate you will be looking for an entrepreneurial opportunity in a thriving company, and in a promising market segment. You will have at least one year of relevant carbon market and/or environmental/sustainability experience as a consultant or in industry. You possess a degree in Engineering, Economics, Environmental Science/Policy; advanced degree a plus. The job description entails a good grasp of the technologies, policies and calculation methods associated with climate change along with a passion for tackling the problem are essential. We're also looking for excellent project management skills and the

ability to communicate effectively with both internal and external stakeholders. Willingness to travel and fluency in English are a must. Additional foreign language skills are welcome. This is a role of strategic importance – we therefore ask you to send your application directly to the Managing Director of 3C Group – The Carbon Credit Company, LLC:

Björn Fischer
